

AMERICAN INDIANS AND THEIR LAND STUDY GUIDE

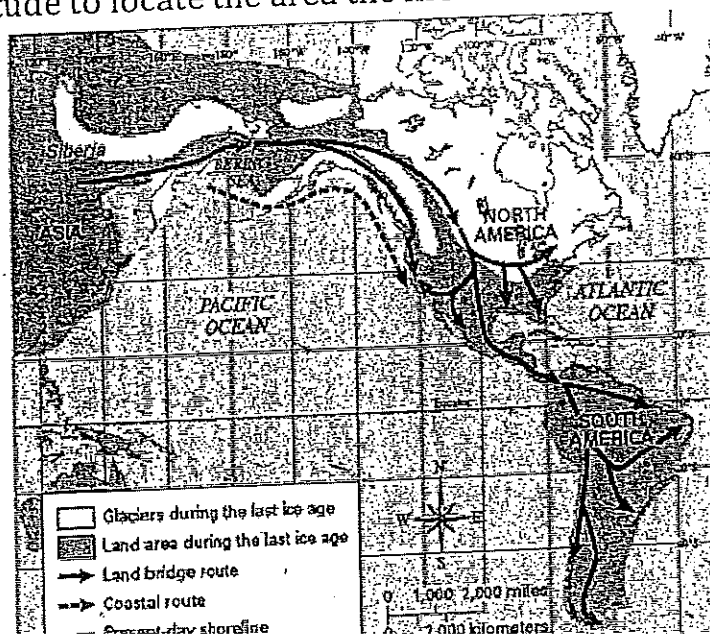

MULTIPLE CHOICE

1. What is a natural environment?
2. What is an origin story?
3. What is the Hopi origin story?
4. What animals are considered 'big game'?
5. How did early Americans adapt to their environments?
6. How did early Americans decide where to settle?
7. What natural resources did Inuits use to survive in their environment? How did they use these resources?
8. How did the Sioux record their history? What natural resources did they use?

FILL IN THE BLANK

Use latitude and longitude to locate the area the first Americans migrated from

9. Most scientists believe that the first Americans came from the continent of _____.

10. The first Americans began their migration at a place located at about _____ latitude.

11. What two continents did early Americans migrate to and settle in?

12: What caused early Americans to migrate? What did they follow?

What are the four different environments in North America? Name one natural resource found in each:

1.

2.

3.

4.

SHOW WHAT YOU KNOW

13. Look at the image on the previous page. Draw a simple sketch of each of the three family members. Complete a large speech bubble for each person. The speech bubbles should follow these guidelines:

- One family member will tell about the migration route his or her ancestors took to reach the area

where the family lives today.

- One family member will describe the environment in which the family lives and mention at least

three of the natural resources.

- One family member will describe two objects the family has made and explain how these objects help them to survive in their environment.
